CLINICALLY PROVEN, SELF-LEARNING NEUROMODULATION BROUGHT TO EVERYDAY LIFE

We, private and public capital backed technology enthusiasts, address globally important challenges to brain health such as migraine & dementia. Our purpose-driven founding team brings extensive international experience in MedTech, Neuroscience, and Artificial Intelligence from the US, UK, Germany, and Austria.

This domain expertise is paired with extensive experience in state-of-the-art deep learning technologies, neuroengineering, and scalable software engineering. We are proud to be supported by a seasoned set of industry experts and outstanding advisors from Academia and MedTech.

We are an equal-opportunity employer and value diversity. We consider all applications equally regardless of race, color, ancestry, religion, sex, national origin, sexual orientation, age, citizenship, marital status, disability, or gender identity. We strongly encourage individuals from groups traditionally underrepresented in tech to apply, and we can help with immigration.

WHAT WE VALUE:

- Driving change in the field of neurotechnology, fast
- Working on a cause that one can be proud of
- Intellectual integrity
- Taking ownership
- Having fun

WHAT WE OFFER:

- Purpose
- Meritocracy
- Highly competitive compensation & vacation package
